## Embedded Application Software Engineer

### Tattile

Have you ever imagined working for a state-of-the-art computer vision company dealing with machine learning based products generating a durable impact for the Planet?

Tattile is a world leader and double-digit growing player in the ITS (Intelligent Transportation Systems) market, offering edge technology (Smart Cameras + Artificial Intelligence/AI) for Smart Cities and modern, green and safe Mobility Applications.

### ► Scope

As a Embedded Application Software Engineer, you will be responsible for:

- Cooperate in a team to design, develop and deploy onboard application on Tattile Smart Cameras;
- Testing embedded application running on Tattile Smart Cameras;
- Cooperate with Algorithm Team to integrate algorithms into Tattile Smart Cameras;
- Cooperate with BSP & Hardware Team to integrate the applications on Tattile Smart Cameras;
- Profile embedded applications running on Tattile Smart Cameras.

### ► Requested technical skills

- 3+ year experience in complex application development (embedded is not mandatory);
- C++ or Rust experience;
- Linux;
- Git;
- REST protocol is a plus;
- Functional programming is a plus;
- Other Software Languages are a plus.

### Offer

We offer an excellent salary and the opportunity to be a game changer in an innovative and technology driven company; you will be part of a young and dynamic team, collaborating with a worldwide network of Hi-Tech partners.
