Web & Infrastructure Software Engineer

Tattile

Have you ever imagined working for a state-of-the-art computer vision company dealing with machine learning based products generating a durable impact for the Planet?

Tattile is a world leader and double-digit growing player in the ITS (Intelligent Transportation Systems) market, offering edge technology (Smart Cameras + Artificial Intelligence/AI) for Smart Cities and modern, green and safe Mobility Applications.

► Scope

As a Web & Infrastructure Software Engineer, you will be responsible for:

- Work on R&D Projects spanning from Traffic to Railways applications;
- Cooperate in a team to design and develop modern web application to interact with Tattile Smart Cameras;
- Cooperate in a team to design and develop complex system tests for Tattile Smart Cameras validation;
- Use and manage the DevOps tool chain;
- Cooperate in a team to design and develop internal tools;
- Participate to the realization of new Smart Cameras;
- Collaborate with a multi-disciplinary team, discussing technical challenges.

► Requested technical skills

- 2+ year experience in web software development;
- Experience with Angular or React frameworks;
- UI & UX design experience;
- REST protocol;
- Java 1.8+ or Scala;
- Unit testing;
- Experience with Rust is a plus;
- Functional programming is a plus;
- English is a must, other additional foreign languages a plus.

Offer

We offer an excellent salary and the opportunity to be a game changer in an innovative and technology driven company; you will be part of a young and dynamic team, collaborating with a worldwide network of Hi-Tech partners.
